FEDERAL INSTITUTE OF SCIENCE AND TECHNOLOGY(FISAT)
DEPARTMENT OF COMPUTER SCIENCE & ENGINEERING

SEMESTER VI
MINI PROJECT PROPOSAL

ACADEMIC YEAR: 2025-26 **CLASS : CSE_A/CSE_B/CSE_C/CSD**

Project Batch No:

Domain : Web Application

Project Title : Startup & Freelancer Incubation Management System

Team Members

Name	Roll No	Register No.
UNNIMAYA M	61	FIT23CS193
THEJASREE V P	58	FIT23CS191
NIKITA MARY JASON	15	FIT23CS147
NANDANA BIJULAL	4	FIT23CS136

Languages Expected To Be Used : Python, HTML, CSS, JavaScript

Packages/Libraries/External Apis Expected To Be Used (If Any) :

Django, django-widget-tweaks, Pillow, python-dotenv, requests, supabase, Gemini API

Special Hardware Interfaces Expected To Be Used (If Any) :

None

Problem Statement :

Current incubation workflows are fragmented, causing delays in project initiation, inconsistent proposal evaluation, and limited mentorship traceability. A unified system is needed to manage roles, projects, proposals, and mentorship with trust and transparency.

Abstract :

This project develops a role-based web platform that connects startups, freelancers, and mentors. It supports project posting, proposal submission and ranking, mentorship scheduling, and AI-assisted verification. The system improves collaboration efficiency and trust through structured workflows and notifications.

Applications *(Include socially relevant applications)* :

Startup project management
Freelancer onboarding and evaluation
Mentor engagement, academic incubation support
Structured collaboration for small teams.

Sustainable Development Goals Addressed *(Select the most relevant goals. Multiple SDGs may be included.)*: *(Mention relevant SDG number and short justification (2-3 lines).)*

SDG 8 (Decent Work & Economic Growth)
SDG 9 (Industry, Innovation & Infrastructure)
the platform improves access to work opportunities and supports innovation through structured collaboration.
